

St. Francis completes review

GREEN SPRINGS – St. Francis Health Care Centre, a non-profit, Catholic faith-based, residential care community, went through their annual survey with the Ohio Department of Health's Long Term Care Annual Survey with a great evaluation again.

"I'm proud of our dedicated employees and volunteers who do a great job and that ODH recognized the great work that is done here everyday," said Kim Eicher, CEO in response to survey results.

The survey follows 15 standards of care: Resident's rights, resident behavior and facility practices, quality of life, resident assessment, quality of care, nursing services, dietary

services, physician services, specialized rehabilitation services, dental services, pharmacy services, infection control, physical environment and administration.

"Our great team work and the pride we take in providing exceptional resident care is the reason for the great survey," noted Linda Mason, Nursing Home Administrator.

"Though the survey process

is an intense four-day period, we know our care at St. Francis Health Care Centre, Green Springs, is so excellent that we welcome the opportunity to have ODH surveyors in our facility as we fulfill our mission of providing wholistic long-term care and rehabilitation services in a dignified, joyful and compassionate manner in the service of God's people."
